

TECHNICAL STAFFING

Hire the Right Technical Talent.

Skilled engineers, programmers and technicians, recruited by the team that hires GLOBAL's own engineering talent.

RECRUITERS WHO KNOW ENGINEERING
DIRECT HIRE • CONTRACT • CONTRACT-TO-HIRE

TECHNICAL TALENT

The People Behind Production.

From specialized engineering roles to skilled plant-floor support, GLOBAL recruits the people your team needs to keep projects and production moving.

WHEN TO CALL GLOBAL

- ✓ A technical opening is holding up work
- ✓ A launch or ramp needs added capacity
- ✓ Your team needs specialized expertise
- ✓ An expansion is increasing headcount
- ✓ Turnover or retirement leaves a gap
- ✓ A project needs people for a defined term

WHO WE PLACE

Controls & Automation

- Controls engineers & PLC programmers
- Robotics engineers, programmers & technicians
- Automation engineers & technicians
- Commissioning & installation engineers

Manufacturing & Maintenance

- Maintenance engineers & technicians
- Production supervisors
- CNC machinists & programmers
- Material handlers

Engineering & Design

- Mechanical & electrical engineers / designers
- Manufacturing & process engineers
- Quality engineers
- Project managers

Specialized Technical Roles

- Technical instructors & training specialists
- Wire harness technicians
- Composite technicians
- Diesel technicians

RECENT PLACEMENTS

ROLE PLACED	INDUSTRY	ENGAGEMENT
Robotics Technician	Automation OEM	Contract-to-hire
Autonomous Driving Engineer	Heavy Truck OEM	Contract
Software Controls Engineer	Automation OEM	Contract-to-hire
Senior Automation Engineer	System Integrator	Direct hire
Production Supervisor	Automotive OEM	Long-term contract

FLEXIBLE WAYS TO HIRE

Scale Up. Scale Down. Or Hire.

Fill a permanent role, evaluate a long-term fit or add capacity for a project.

GLOBAL aligns the recruiting approach with what you need.

DIRECT HIRE

Fill permanent engineering and technical roles with candidates who fit the role and your team.

GLOBAL sources and screens for you, so your managers interview only the right people.

Contract Staffing

Scale your team for launches, ramps or busy seasons, from six-month assignments to long-term ongoing support.

Contract-to-Hire

Work together first, then hire once you know the fit is right. Contract placements regularly convert to permanent hires.

THE ENGINEERING EDGE

We Hire the Engineers Behind GLOBAL.

Our recruiters work alongside engineers and hire the technical talent on GLOBAL's own automation teams. They understand the work and the high standards we expect, and bring that experience to your search.

Automation Is Our Trade

We staff what we do every day: the same robots, controls and plant floors.

We Know Real Experience

We recognize the difference between hands-on integration experience and theoretical knowledge.

We Move When the Req Opens

Send the requisition or SOW and sourcing starts now, not next vendor cycle.

One Point of Contact

A senior account manager from first call to placement. No handoffs.

HOW IT WORKS

1

Tell Us the Role

Role, skills, location, timing and duration. Rate and terms agreed up front.

2

We Source & Screen

We find and screen candidates, drawing on our experience hiring GLOBAL's own engineers.

3

You Interview & Choose

Meet qualified candidates and choose the right fit for your team.

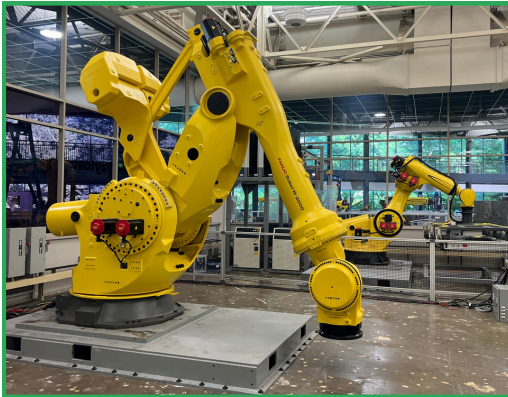

4

We Onboard & Support

We handle onboarding and stay engaged through the assignment.

ABOUT GLOBAL

One partner to design, build, service, and staff your manufacturing automation.

SOLUTIONS Turnkey automation, retools, upgrades and retrofits
GLOBAL designs, builds, and integrates custom automation systems from tooling and lean stations to robotic cells and full production lines.

SERVICES Programming, maintenance & engineering support
Programming, commissioning, troubleshooting, maintenance, training and process support for the automation you already run.

STAFFING GLOBAL recruiters help you hire technical talent
Controls, robotics and engineering professionals for direct-hire, contract and contract-to-hire roles.

WHY GLOBAL STAFFING

**Built on the plant floor.
Recruiting for it ever since.**

GLOBAL was founded in 2009 as an automation engineering company. Today, a dedicated recruiting team, led by senior account managers, places technical talent across manufacturing and industrial companies.

40+ YEARS COMBINED

Account management in technical staffing

TRUSTED BY OEMs

Our first placement is rarely the last

WBENC CERTIFIED

Counts toward your supplier diversity goals

Focused where manufacturing is.

110+

team members

17+

years in automation

USA

plus Canada & Mexico

Need technical talent for your team?

Tell us who you need, and we'll start sourcing as soon as the req opens.
